

Project Title: North Portsea Island Phase 3 (Tipner)

Project Objectives: Trialling Tide Pools and BESE Grid.

Lead Organisation and Partners: Eastern Solent Coastal Partnership

Is the project part of a wider development scheme? Flood and Coastal Erosion Risk Management Scheme.

What were the drivers for undertaking enhancement measures, e.g. mitigation, net gain: Enhancement and Mitigation/ Net Gain.

Please detail funding sources for the ecological enhancement(s) element: Donation by companies involved.

Geographical location of the project - OS grid reference/GPS coordinates if available: * SU 652045.

What consents or licences did the project require: Planning Permission and a Marine Licence.

What type of coastal environment are the enhancements located in, e.g. estuary, open coast, urban coast?: Estuary.

If the enhancements were part of a larger development or scheme, please indicate at what stage the enhancements were included in the design: Detailed Design Phase. - Opportunistic

What are the successes and lessons learnt from undertaking enhancement work? Too early to say at the present time

Will the enhancements be monitored for their biodiversity value, if yes please give details: Yes - Fixed point photography and hopefully Bournemouth University monitoring.
